

STATE OF CALIFORNIA  
STATE WATER RESOURCES CONTROL BOARD  
**DIVISION OF WATER RIGHTS**

**ORDER**

APPLICATION 17781 PERMIT 12000 LICENSE 6710

ORDER CORRECTING POINT OF DIVERSION  
AND AMEND LICENSE

**WHEREAS:**

1. License 6710 was issued to Donner Lake Utility Company on May 28, 1963 and recorded with the County Recorder of Nevada County on May 28, 1963 in Document 3247, Volume 336, Page 337.
2. An inspection was made of the project area on June 4, 1992 by the State Water Resources Control Board (State Water Board) staff and it was recommended the description of the point of diversion (POD) should be corrected.
3. A correction is needed to conform the description of the POD with the location on the USGS (7.5') quadrangle map - Norden.
4. The State Water Board has determined the above correction will not initiate a new right nor will operate to the injury of any other lawful user of water and that good and sufficient cause has been shown for said correction.
5. The license condition pertaining to the continuing authority of the State Water Board does not conform to the current common law public trust doctrine as contained in Title 23, California Code of Regulations, Section 780(a).

**NOW, THEREFORE, IT IS ORDERED THAT:**

1. The description of the point of diversion under this license be corrected to read:

South 900 feet and West 150 feet from the NE corner of Section 14, T17N, R15E, MDB&M, being within the NE $\frac{1}{4}$  of NE $\frac{1}{4}$  of said Section; also described as California Coordinate System, Zone 2, N 609,200 and E 2,488,700.

2. The continuing authority condition under this license be amended to read:

Pursuant to California Water Code Sections 100 and 275, and the common law public trust doctrine, all rights and privileges under this permit and under any license issued pursuant thereto, including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of the State Water Resources Control Board in accordance with law and in the interest of the public welfare to protect public trust uses and to prevent waste, unreasonable use, unreasonable method of use, or unreasonable method of diversion of said water.

3

The continuing authority of the Board may be exercised by imposing specific requirements over and above those contained in this permit with a view to eliminating waste of water and to meeting the reasonable water requirements of permittee without unreasonable draft on the source. Permittee may be required to implement a water conservation plan, features of which may include but not necessarily be limited to: (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this permit and to determine accurately water use as against reasonable water requirements for the authorized project. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation.

The continuing authority of the Board also may be exercised by imposing further limitations on the diversion and use of water by the permittee in order to protect public trust uses. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such action is consistent with California Constitution Article X, Section 2; is consistent with the public interest and is necessary to preserve or restore the uses protected by the public trust.
